

Plan for everything, be ready for anything

Prepare, optimize, and evolve your supply chain with Flexible Warehousing Infrastructure

Having the right space in the right place is crucial for supply chain resilience. However, traditional warehousing can become a maze of complexity and hinder strategic planning.

With Flexible Warehousing Infrastructure, you can be as dynamic as demand. Flexible Warehousing Infrastructure provides:

A network of 700+ operators with ~3,000 warehouses throughout the U.S. and Canada

Operational excellence with a dedicated team of logistics experts

A simple, scalable warehouse management system (WMS)

Proprietary network data and warehouse market intelligence with visibility, analytics and insights

“Flexibility and speed were big considerations. By having our inventory [in the Flexe network], if we see changes in the marketplace and it doesn’t work for us in years 3, 4, and 5 the way it worked for us in Year 1, we have the flexibility to change our plans.”¹

Manager of Logistics Design and Planning, Omnichannel Retail

What you gain with Flexe

Scale

- Consolidate management of your network, billing, contracting, and administration tasks
- Integrate once, deploy anywhere with consistent visibility, analytics and insights
- Standardize your network across regional, national, and global providers
- Contract or expand your network without excessive costs and complexity

Flexibility

- No start-up, WMS, network optimization or integration costs
- Course correct to support changes to strategic plans, forecasts, and continuous improvement efforts
- Reduce utilization and forecasting risk by allocating space where needed

Speed

- Launch and make warehouse changes in weeks
- Accelerate onboarding and simplify implementation

What you can manage better with Flexe

Multi-year strategic initiatives

- Enter and expand into new markets
- Accelerate eCommerce and omnichannel fulfillment
- Reduce transportation costs
- Consolidate and optimize networks
- Manage on/near-shoring

Continuous improvement

- Improve store replenishment SLAs
- Test new sales channels
- Launch new products fast
- Optimize seasonal SKUs
- Manage big and bulky SKUs

Disruptive events

- Disaster relief
- Forecast misses
- Opportunistic bulk buys
- Excess inventory
- Raw materials
- Mergers and acquisitions

Ready to make flexible infrastructure the plan instead of the reaction?
